

## Resources to aid collection of DairyBase information

The below is a list of resources that will make the processes of collecting DairyBase data faster and more accurate. You may not have all these documents available don't panic, just collate what you can. Feel free to pull together other information you may feel is also useful.

The majority of reports listed are available from herd improvement company recording programs (e.g. MINDA) provided your records are up to date.

### Milk production

- Annual dairy company final production statement (*financial season & production season if different*)\*
- December dairy company production statement\*
- Dairy company production statement for month peak production/cow achieved\*
- Dairy company SCC report\*

*\*or access to dairy company website*

### General
